

## Year 2 team supporting the awareness of Global goals and our value topic of Appreciation

The initiative included a poster competition to promote healthy living and wellbeing with cross curricular links in Science and English. To support the wellbeing of the community, the students wanted to start the initiative in their own school by providing selected staff (cleaners, maintenance and security team) with some home items to develop their understanding of care and appreciation. The students presented the items to the staff themselves with the proud support of our Principal.
